George E. Davenport
Dear Sir

Some of us here have organized a Society for the encouragement of Scientific Study and called it the "Santa Barbara Society of Natural History" and I have been requested to find out ~~xxxxxx~~ the uniform size of cards, if any, used by Societies for Algae. Could you give me the information on this point?

We are going to work at once to prepare exchanges, but before making a beginning would like to know whether or not there is a certain size of card used for this purpose.

I shall let you hear from us
from time to time as we proceed
in our work.

Yours very truly
Jno. P. Cooper
